

CYBERCRIME AWARENESS CASE STUDY & PREVENTION GUIDE

Prevention Checklist:

Create a 'Stay Safe Online' checklist with at least 8 specific, actionable prevention tips relevant to college students in India

Stay Safe Online – Checklist

Never share your OTP, password or UPI PIN with anyone, even if they say they are from bank.

- Always check properly before accepting any UPI request, sometimes “receive money” is actually payment.
- Do not click on unknown links from WhatsApp, SMS or email, they can be fake or harmful.
- Avoid scanning random QR codes, specially from unknown people or messages.
- Use strong passwords and try to change them time to time for better security.
- Enable two-factor authentication (2FA) for important apps like banking and email.
- Do not use public Wi-Fi for payments or logging into sensitive accounts because it is not safe.
- Install apps only from trusted sources like Play Store, not from random links.
- Be careful while sharing personal details on social media, it can be misused.
- If you get any suspicious call asking for money or details, don't trust it and verify first.
