

DIGITAL LITERACY (FOR STUDENTS)

1) What is Digital Literacy ?

Digital literacy means having the ability to use digital tools and the internet in a smart and responsible way. It is not just about using devices, but also about understanding how to find information, communicate online, and stay safe. For students, it plays an important role in learning, completing assignments, and interacting in the digital world.

2) Useful Digital Tools :-

Students today use many digital tools to make their work easier and more efficient. Platforms like Google Docs help in writing and sharing assignments, GitHub is useful for managing coding projects, and LinkedIn helps in building a professional profile. These tools also improve collaboration and allow students to learn new skills

3) Stay Safe Online :-

Using the internet safely is very important in today's time. Students should always use strong passwords and avoid clicking on unknown links or messages. Personal information should never be shared carelessly. Being careful while browsing and staying aware of online threats can help prevent cyber risks

4) Email Etiquette:-

Writing emails in a proper and professional manner is an important skill. A good email should always have a clear subject line and polite language. It should begin with a proper greeting and end with a respectful closing. Following basic email etiquette helps in clear communication, especially in academic and professional situations.
